
ENVIRONMENTAL POLICY STATEMENT

Fasset Ltd

Head Office Address

Langstone Technology Park, Langstone Rd, Havant PO9 1SA

www.langtp.com T: 023 9249 7000

At Fasset, we recognise that our business activities have varying direct and indirect impacts on the society and environment in which we operate. As such we are committed to reducing the environmental impact of our activities to a practical minimum by constantly reviewing our environmental objectives and targets based on our business activities and the changing needs of our clients. Fasset see it as our duty to carry out all reasonably practicable measures to continually improve our environmental performance through the effective implementation of our Environmental Management Systems, which is why our sites are certified to ISO 14001.

We aim to manage and ultimately reduce our environmental impacts and improve overall performance by:

- Complying with environmental laws, regulations and codes of practice to which we subscribe and which relate to our environmental responsibilities.
- Regularly monitoring legislative changes, and communicating them to employees and where applicable customers and suppliers.
- Educating all employees, and where applicable customers and suppliers to create awareness and a thorough understanding of environmental responsibility based on our EMS requirements.
- Continually improving the business processes, services and technologies used across our parks.
- Actively seeking opportunities to prevent pollution by reducing, reusing and recycling waste.
- Proactively managing our impacts through regular review of our Aspects and Impacts Registers, to reflect the current position of the business at any one time.
- Incorporating environmental commitment and responsibility into all business operations across all parks including procurement activities, where we will endeavour to source seasonal, local and sustainable goods wherever possible.
- Implementing policies and procedures to reduce our carbon footprint by encouraging modes of transport that will have a positive impact on the environment.
- Minimising water consumption.
- Minimising the risk of chemical pollution.
- Reducing energy consumption, in particular energy derived from fossil fuels, wherever possible.

Fasset will communicate and make this policy readily available to our employees, tenants, contractors, suppliers and any interested parties in order to create awareness and to demonstrate our commitment to environmental improvements. We will periodically evaluate compliance of this policy by conducting rigorous audits and self-assessments to ensure we meet our environmental objectives and targets.
